Ambrose, H A. (see Loomis, A. G.)—207

Barnes, Colin. Diffusion through a membrane—4
Barton, Lois E. (see Parks, George S.)—193
Beeuwkes, R. Concerning the effect of strain and rate of strain on tensile tests at normal and elevated temperatures—135
Bingham, Eugene C. and Johns A. Geddes. Further studies on the relation between constitution and association: especially in reference to aromatic compounds—42
——— **and Robert A. Stephens.** Alternating stress method for the measurement of the consistency of very still materials—217
Bloomenthal, S. Nonmetallic conducting films—225
Botset, Holbrook G. Radium content of some connate waters—276
——— (see Wyckoff, R. D.)—265
Bozorth, R. M. (see Haworth, F. E.)—15
Bridgeman, Oscar C. What is oiliness?—125
Brown, Lawrence E. On the theory of an *N*-winding transformer—61
Browne, T. E., Jr. Dielectric recovery of a.c. arcs in turbulent gases—103
Burger, E. E. (see Hull, Albert W.)—384

Chapman, Seville. Charges on droplets produced by the spraying of liquids as revealed by the Millikan oil drop method—150
Clark, George L. and Julia Southard. Sorption on cotton fibers of dyes with varying molecular association in solution—95
Crary, A. P. (see Ewing, Maurice)—165; 181; 317

Dehlinger, Walter. Space charge grid tube with variable mu grid—173

Ewart, R. H. (see Mooney, M.)—350
Ewing, Maurice and A. P. Crary. Study of emergence angle and propagation paths of seismic waves—317
———, **A. P. Crary and A. M. Thorne, Jr.** Propagation of elastic waves in ice. Part I—165
——— **and A. P. Crary.** Propagation of elastic waves in ice. Part II—181

Fink, George A. (see Fox, Gerald W.)—302
Fox, Gerald W. and George A. Fink. Piezoelectric properties of quartz and tourmaline—302

Geddes, John A. (see Bingham, Eugene C.)—42
Gray, Marion C. Mutual impedance of grounded wires lying on the surface of the earth when the conductivity varies exponentially with depth—35

Hasler, M. F. Thermoelectric metal-crystal analyzer—9
Haworth, F. E. and R. M. Bozorth. Shot effect and electrical breakdown in insulators—15
Hickman, Roger W. Investigation of an alternating-current method of determining critical potentials—185
Hulburt, E. O. Absorption of heat rays by fog—101
Hull, Albert W. and E. E. Burger. Glass-to-metal seals—384
Hurst, William. Unsteady flow of fluids in oil reservoirs—20

Ingberg, S. H. Methods for calculating the volumetric composition of fluid mixtures—64

Jesse, William P. X-ray crystal measurements of nickel at high temperatures—147

Kelsall, G. A. Permeability changes in ferromagnetic materials heat treated in magnetic fields—169
Kennedy, H. T. (see Loomis, A. G.)—207
Kiehl, H. R. Electrical conductivity of glass. Part I. The formation of highly resistant layers—363; Part II. Current increase phenomena with highly resistant layers—370
Kuethe, A. M. (see Wattendorf, F. L.)—153

LaCoste, Lucien J. B., Jr. New type long period vertical seismograph—178
Loomis, A. G., H. A. Ambrose and H. T. Kennedy. Some rheologic aspects of petroleum production—207

MacGregor, C. W. Concerning the distribution of stress in a laterally compressed strip—140
Madge, E. W. Viscosities of liquids and their vapor pressures—39
Merkel, Wilhelm. Flow characteristics of sewage sludge and other thick materials—355
Meserve, Wilbur E. Behavior of a copper oxide photoelectrolytic cell when used with sinusoidally varying illumination—244
Mooney, M. and R. H. Ewart. Conicylindrical viscometer—350
Muskat, Morris. Flow of compressible fluids through porous media and some problems in heat conduction—71
——— Two fluid systems in porous media. The encroachment of water into an oil sand—250

Neitzert, C. Thermal agitation voltages in resistors—292
Parks, George S., Lois E. Barton, Monroe E. Spaght and J. Wilfred Richardson. Viscosity of undercooled liquid glucose—193
Pearson, G. L. Fluctuation noise in vacuum tubes—233

Pekeris, Chaim L. Inverse boundary value problem in seismology—307
Pichot, M. Viscosity anomalies—200
Pittman, C. U. and R. N. Traxler. Rheological properties of asphalts. I. Effect of temperature—221

Poritsky, Hillel. Analysis of thermal stresses in sealed cylinders and the effect of viscous flow during anneal—406

Rashevsky, N. Mechanism of division of small liquid systems which are the seats of physico-chemical reactions—374
Reber, R. K. Effect of nascent hydrogen on the magnetic properties of iron—297
Reiner, Markus. Theory of non-Newtonian liquids—321
——— Viscometric studies of rubber solutions—342
Richardson, J. Wilfred (see Parks, George S.)—193
Richmond, W. O. Creep of wires at high temperature—131

Schilling, Harold K. Mosaic crystals of zinc—1
Smith, Howard A. Fatigue and crystal recovery in aluminum—412
Southard, Julia (see Clark, George L.)—95
Spaght, Monroe E. (see Parks, George S.)—193
Steinberger, R. L. Stress-strain relation in textile fibers—53
Stephens, Robert A. (see Bingham, Eugene C.)—217
Stevenson, A. F. On the theoretical determination of earth resistance from surface potential measurements—114
Suits, C. G. Stabilizing arcs by electrode surfacing—380

Thorne, A. M., Jr. (see Ewing, Maurice)—165
Traxler, R. N. (see Pittman, C. U.)—221

Wadell, Hakon. Some new sedimentation formulas—281
Wattendorf, F. L. and A. M. Kuethe. Investigations of turbulent flow by means of the hot-wire anemometer—153
Wissink, G. M. Magneto-optic method of determining the vitamin content of various substances—31
Wyckoff, R. D. and H. G. Botset. Experimental study of the motion of particles in systems of complex potential distribution—265

Analytic Subject Index to Volume 5

Absorption
Of dyes by cotton fibers, G. L. Clark, J. Southard—95
Absorption and reflection of light
Heat rays absorbed by fog, E. O. Hulburt—101
Acoustics
Elastic waves in ice, M. Ewing, A. P. Crary, A. M. Thorne, Jr.—165
Flexural and transverse waves in ice, M. Ewing, A. P. Crary—181
Aerodynamics (see also **Hydrodynamics**)
Turbulent flow measured by hot wire anemometer, F. L. Wattendorf, A. M. Kuethe—153
Volumetric composition of mixtures of gases, S. H. Ingberg—64
Arcs (see also **Discharge of electricity in gases**)
Extinction of a.c. arcs, T. E. Browne, Jr.—103
Stabilizing arcs by electrode surfacing, C. G. Suits—380

Conductivity, electrical (see **Electrical conductivity; Discharge of electricity in gases**)
Crystalline state
Creep of wires at high temperature, W. O. Richmond—131
Fatigue and crystal recovery in Al, H. A. Smith—412
Mosaic structure in Zn, H. K. Schilling—1
Nascent H_2 and magnetic properties of Fe, R. K. Reber—297
Permeability changes in magnetic alloys, G. A. Kelsall—169
Piezoelectric properties of quartz and tourmaline, G. W. Fox, G. A. Fink—302
Strain and rate of strain at various temperatures, R. Beeuwkes—135
Thermal expansion of Ni lattice, W. P. Jesse—147
Crystals, structure
Of Ni at high temperatures, W. P. Jesse—147

Diffusion
Of gases and volumetric composition of mixtures, S. H Ingberg—64
Of liquid through a membrane, C. Barnes—4
Discharge of electricity in gases (see also **Arcs**)
Stabilizing arcs by electrode surfacing, C. G. Suits—380

Elasticity
Creep of wires at high temperature, W. O. Richmond—131
Distribution of stress in a laterally compressed strip, C. W. MacGregor—140
Elastic waves in ice, M. Ewing, A. P. Crary, A. M. Thorne, Jr.—165
Emergence angle and paths of seismic waves, M. Ewing and A. P. Crary—317
Fatigue and crystal recovery in Al, H. A. Smith—412
Flexural and transverse waves in ice, M. Ewing and A. P. Crary—181
Inverse boundary value problem in seismology, C. L. Pekeris—307
Strain and rate of strain at various temperatures, R. Beeuwkes—135
Stress-strain relation in textile fibers, R. L. Steinberger—53
Thermal stresses in sealed cylinders, viscous flow during anneal, H. Poritsky—406
Electrical circuits
N-winding transformer, theory of, L. E. Brown—61
Thermal agitation voltages in resistors, C. Neitzert—292
Electrical conductivity and resistance
Breakdown in insulators, F. E. Haworth, R. M. Bozorth—15
Earth resistance from surface potential measurements, A. F. Stevenson—114
Of glass, current increase with highly resistant layers, H. R. Kiehl—370
Of glass, formation of highly resistant layers, H. R. Kiehl—363
Mutual impedance of wires on surface of earth, M. C. Gray—35
Of nonmetallic films, S. Bloomenthal—225
Electrons in metals
Thermal agitation voltages in resistors, C. Neitzert—292
Electron tubes (see **Vacuum tubes**)
Electrostatics
Charges on droplets produced by spraying, S. Chapman—150

Fluidity (see **Viscosity**)
Friction
What is oiliness? O. C. Bridgeman—125

Geophysics
Earth resistance from surface potential measurements, A. F. Stevenson—114
Elastic waves in ice, M. Ewing, A. P. Crary, A. M. Thorne, Jr.—165
Emergence angle and paths of seismic waves, M. Ewing, A. P. Crary—317
Inverse boundary value problem in seismology, C. L. Pekeris—307
Ra content of connate waters, H. G. Botset—276
Vertical seismograph, long period, L. J. B. LaCoste, Jr.—178

Hydrodynamics (see also **Aerodynamics**)
Flow characteristics of thick materials, W. Merkel—350
Flow of compressible fluids through porous media, M. Muskat—71
Motion of particles in systems of complex potential distribution, R. D. Wyckoff, H. G. Botset—265
New sedimentation formulas, H. Wadell—281
Theory of non-Newtonian liquids, M. Reiner—321
Two fluid systems in porous media, M. Muskat—250
Unsteady flow in oil reservoirs, W. Hurst—20

Instruments (see **Methods and instruments**)
Insulators
Shot effect and electrical breakdown, F. E. Haworth, R. M. Bozorth—15
Isotopes
Diffusion through a membrane, C. Barnes—4

Liquids (see also **Hydrodynamics**)
Division of small liquid systems, N. Rashevsky—374
Flow of compressible fluids through porous media, M. Muskat—71
Unsteady flow in oil reservoirs, W. Hurst—20

Magnetic properties
Alloys heat treated in magnetic fields, permeability changes, G. A. Kelsall—169
Effect of nascent H_2 on Fe, R. K. Reber—297
Magneto-optical effects
Determination of vitamin content, G. M. Wissink—31
Meteorology
Charges on droplets produced by spraying, S. Chapman —150
Methods and instruments
Alternating stress method for measurement of consistency of materials, E. C. Bingham, R. A. Stephens —217
Conicylindrical viscometer, M. Mooney, R. H. Ewart—350
Critical potentials, a.c. method, R. W. Hickman—185
Glass-to-metal seals, A. W. Hull, E. E. Burger—384
Motion of particles in systems of complex potential distribution, R. D. Wyckoff, H. G. Botset—265
N-winding transformer, theory of, L. E. Brown—61
Photoelectrolytic cell, characteristics, W. E. Meserve—244
Ra in waters, H. G. Botset—276
Rheologic aspects of petroleum production, A. G. Loomis, H. A. Ambrose, H. T. Kennedy—207
Solutions of heat conduction problems, M. Muskat—71
Thermoelectric metal-crystal analyzer, M. F. Hasler—9
Turbulent flow measured by hot wire anemometer, F. L. Wattendorf, A. M. Kuethe—153
Vertical seismograph, long period, L. J. B. LaCoste, Jr. —178

Petroleum production
Encroachment of water into an oil sand, M. Muskat—250
Flow of compressible fluids through porous media, M. Muskat—71
Motion of particles in systems of complex potential distribution, R. D. Wyckoff, H. G. Botset—265
Rheologic aspects of petroleum production, A. G. Loomis, H. A. Ambrose, H. T. Kennedy—207
Unsteady flow in oil reservoirs, W. Hurst—20
Photoelasticity
Distribution of stress in a laterally compressed strip, C. W. MacGregor—140
Photoelectric effect and properties; cells
CuO cell, varying illumination, W. E. Meserve—244
Plasticity
Theory of non-Newtonian liquids, M. Reiner—321
Polymerization
In aromatic compounds, E. C. Bingham, J. A. Geddes—42
Potentials, critical
a.c. method, R. W. Hickman—185

Radio
Fluctuation noise in vacuum tube, G. L. Pearson—233
Space charge grid tube with variable mu grid, W. Dehlinger—173
Radioactivity
Ra content of connate waters, H. G. Botset—276

Sedimentation
New sedimentation formulas, H. Wadell—281
Solid state (see **Crystalline state**)
Sorption (see **Absorption**)

Thermal conductivity
Solutions of problems in heat conduction, M. Muskat 71
Thermal expansion
Glass-to-metal seals, A. W. Hull, E. E. Burger—384 —
Of Ni, from x-ray data, W. P. Jesse—147
Thermal stresses in sealed cylinders, viscous flow during anneal, H. Poritsky—406
Thermoelectric effects
Metal-crystal analyzer, thermoelectric, M. F. Hasler—9

Vacuum tubes
Fluctuation noise, G. L. Pearson—233
Variable mu tube, space charge grid, W. Dehlinger—173
Vapor pressure
And viscosities of liquids, E. W. Madge—39
Viscosity
Alternating stress method for measurement of consistency of materials, E. C. Bingham, R. A. Stephens —217
Some anomalies, M. Pichot—200
Conicylindrical viscometer, M. Mooney, R. H. Ewart—350
Consistency of asphalt, effect of temperature, C. U. Pittman, R. N. Traxler—221
Factor in petroleum production, A. G. Loomis, H. A. Ambrose, H. T. Kennedy—207
Of 15 ortho, meta and para compounds, E. C. Bingham, J. A. Geddes—42
Flow characteristics of thick materials, W. Merkel—355
And "oiliness," O. C. Bridgeman—125
Of rubber solutions, M. Reiner—342
Theory of non-Newtonian liquids, M. Reiner—321
Of undercooled liquid glucose, G. S. Parks, L. E. Barton, M. E. Spaght, J. Wilfred—193
And vapor pressure, E. W. Madge—39
